GraphQL

Jest, React Testing Library

Nest.js

PROFILE

I'm a driven and curious software engineer who strives to expand my knowledge and uplift those around me through mentorship. I prioritize teamwork, collaboration and communication and have a track record of leading teams to increased output by focusing on scalable, maintainable systems and tools, while continuing to produce code myself.

EMPLOYMENT HISTORY

Senior Software Engineer, The Working Group, Deloitte Digital

Toronto

Jun 2022 — Present

- Lead technical decisions on projects, based on framework, language and other needs
- Run client meetings, status calls and agile rituals
- Mentor and coach junior engineers
- Run employee learning groups focused on Front End Development

Web Application Developer, The Working Group, Deloitte Digital

Toronto

Nov 2020 — Jun 2022

- Mentored and coached university co-op students during their placement
- Built, iterated and maintained a design system for various front-end projects
- Collaborated closely with designers to build resilient, dynamic and reusable components
- Created a testing pipeline to capture unit, accessibility, visual regression and cross browser tests
- Developed open source contribution guidelines
- On-boarded and trained new engineers to contribute to the design system
- Trained end users on how to implement the design system

Software Developer, Uberflip

Toronto

Mar 2020 — Oct 2020

- Build, update and maintain the content experience platform using PHP, React, Nest.js and MySQL
- Write, run and optimize testing on the platform using sinon, enzyme and Java
- Build and update new APIs and endpoints for both internal and external use
- Plan, build and deliver a new service allowing clients and internal developers more control and faster deployment of their platform

Front End Developer, Uberflip

Toronto

Jan 2019 — Mar 2020

- Customized content management platforms for 400+ clients using SCSS and JavaScript.
- Performed inter-team code reviews to maintain a high standard of code
- Developed a clear and maintainable workflow using JIRA and GitLab

- Built and updated tooling used to automate the development process

Web Developer, GroupBy Inc

Toronto

May 2018 — Jan 2020

- Built and customized user interface and back-end logic for online retailers
- Conducted code reviews for the front end team to ensure high quality code
- Performed unit testing on all components using Mocha and Chai

EDUCATION

Web Development Immersive, Juno

Jan 2018 — Mar 2018
